

The screenshot displays a Qlik Sense dashboard with the following components:

- Visualizations:**
 - case_id by Ward_Type:** A horizontal bar chart showing the distribution of case IDs across different ward types. The x-axis represents 'case_id Count' from 0 to 600. The y-axis lists 'Ward_Type' categories: 'Ward_Type' (approx. 580), 'Ward_Type' (approx. 520), 'Ward_Type' (approx. 380), 'Ward_Type' (approx. 100), and 'Ward_Type' (approx. 20).
 - City_Code_Hospital:** A map visualization showing the geographical distribution of case IDs across different hospital regions. The map is color-coded by region: North (blue), Central (green), South (orange), East (pink), and West (purple).
 - case_id by Department:** A vertical bar chart showing the distribution of case IDs across different departments. The x-axis lists 'Department' categories: 'Hospital', 'To & from house', 'Nursing', 'Dentistry', and 'General'. The y-axis represents 'case_id Count' from 0 to 120,000. The 'General' department has the highest count, exceeding 120,000.
 - case_id by Ward_Facility_Code:** A donut chart showing the distribution of case IDs across different ward facility codes. The chart is divided into six segments with the following percentages: 10.0%, 10.0%, 10.0%, 10.0%, 10.0%, and 10.0%. The total count is 1,37,057.
- Visualizations Panel:** A sidebar on the left containing various visualization icons such as Bar, Pie, Map, and others.
- Right Panel:** A panel on the right side of the dashboard with the message 'No visualization selected' and a button to 'Select a visualization to manage the field settings'.
